DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 recites the limitation "outer flange" in lines 2 and 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by MacKay, Jr.

MacKay, Jr. teaches a backing plate comprising an inner part formed with a hub, 144, having a location hole, 122, with an internal thread, 118, comprising at least two turns and extending over the entire length of the location hole, an outer part having a surface, 102, for adhesively bonding the abrasive wheel to the backing plate. MacKay, Jr. also teaches that the inner part comprises a sunken surface, 104, between the hub and the outer flange, and the sunken

surface lying a distance below the surface of the outer flange and the hub extending above the sunken surface essentially by the distance, (fig. 7).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hornby et al. and Holmes et al. were cited to show other examples of backing plates.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shantese McDonald whose telephone number is (703) 308-8722.
